

expreSSO™

Sentillion's Rollout Planning Service is a packaged service offering that you can use as the foundation for deployment of Sentillion's expreSSO™ single sign-on solution on an enterprise or departmental level. This complete planning engagement will team Sentillion's experienced Implementation Specialists and Program Managers with your I/T personnel for up to three weeks. During that time they will do all the planning necessary to take you from initial pilot to wide-scale rollout.

### Service Highlights

This is a complete four-step planning engagement that covers:

- Development of a roll-out strategy
- Pre-implementation activities
- Implementation activities
- Post-implementation review and planning for continued rollouts

### Approach

With over 400,000 live single sign-on users, and the largest healthcare SSO implementations of any vendor, Sentillion understands single sign-on. Our Implementation Specialists understand clinical workflows, clinical applications, strong authentication technologies, and all aspects of creating a secure identity and access management solution in a healthcare setting. As an integral part of your implementation team, your Implementation Specialist will apply their experience to help your people develop a complete rollout plan. In addition, they will assist with implementing some of the initial project activities required for a successful rollout across a department or enterprise.

### Deliverables

Deliverables for this service include:

- Identification of users, locations, and workstations that will be part of the deployment
- Development of user communications along with your internal marketing department
- Review of use models and clinical workflow
- Workstation configuration definitions
- Determination of go-live support needs
- Definition of support and escalation protocols for post go-live
- Loading of user accounts into the expreSSO Vault from your directory service

### Fees

The expreSSO Rollout Planning Service is a fixed fee service engagement. Travel and living expenses are in addition to the service fees.

### About Sentillion

Since 1998, Sentillion has been revolutionizing healthcare IT with award winning, industry recognized identity and access management technology. Sentillion has successfully combined patented technology with a deep understanding of the healthcare industry to deliver the most comprehensive set of solutions for single sign-on, identity management, clinical workstations and desktop virtualization. Recognized as the number one single sign-on (SSO) vendor in the *KLAS Top 20: 2008 Year-End Report*, Sentillion is the only identity and access management company whose solutions are used daily by over 400,000 caregivers in leading healthcare organizations across North America and Europe. Sentillion is a privately held company headquartered in Andover, Mass. For more information, visit Sentillion at [www.sentillion.com](http://www.sentillion.com).
