**Identity Management  
Solutions**

## Who are we?

Established in 1996 to distribute identity management software products from innovative international suppliers who are not directly represented in Australasia and S.E Asia. eB2Bcom has been a leading centre of ICT expertise in our specialist area of Identity Management.

## What do we do?

eB2Bcom supplies a set of Identity Management solutions designed to provide an Enterprise Meta & Identity Management architecture as well as addressing issues such as employee provisioning, Single Sign On, PKI Certificate and Attribute repositories, White & Yellow pages, Identity Synchronisation, Directory Middleware and Organisational Single Authoritative Data Stores.

## Management & Staff

eB2Bcom is now one of the region's leading independent sources of identity management product and expertise in our market sectors. We have experienced management and staff in locations throughout ASEAN and Australasia

## Markets

Our markets are the main buyers of infrastructure software: Governments, Defence, Police and Intelligence, Banking & Finance, Health, Telcos and ISPs, and the general Corporate sector.

## Partners

We are independent of, but work closely with and for Systems Integrators, Consultants and Outsourcers; Resellers both casual and contracted; Telcos and ISPs; and Technology vendors.

## Summary

eB2Bcom's Identity & Access Management Solutions create the infrastructure to ensure systematic control of authentication, authorisation, access controls, profile management, provisioning, and de-provisioning. This infrastructure is required to ensure that the user's identity is valid, that access to systems is quickly granted and just as quickly revoked, and that profiles can be managed and leveraged across a distributed, infrastructure.
